

Curriculum Vitae

Name: Assistant Professor Himani Garg (PhD)

Address: Källby Ängaväg 4A, 22271 Lund, Sweden

Phone: +46 721566521

E-mail: himani.garg@energy.lth.se

ORCID: <https://orcid.org/0000-0002-5223-0567>

Education

- **PhD in Fluid Mechanics, Oct. 2015 – Feb. 2019, at Université de Lille, France.** Thesis title: “Particle laden inhomogeneous elastic turbulence” supervised by Prof. Gilmar Mompean, Asst. Prof. Enrico Calzavarini, and Assoc. Prof. Stefano Berti.
- **M.Sc. in Mathematics, Aug. 2013 – Jun. 2015, at the National Institute of Technology Rourkela, India.** Thesis title: “Some Studies On Control Theory Involving Schrödinger Group”.
- **B.Sc. in Electronics, Aug. 2010 – Jun. 2013, at Kurukshetra University, India.**

Employment

- **Assistant Professor in Heat Transfer, Sep 2024-present,** at Department of Energy Sciences, Lund University, Sweden (**60% research and 40% supervision, teaching and administrative duties**).
- **Researcher in Heat Transfer, Jul. 2024 – Sep 2024,** at Department of Energy Sciences, Lund University, Sweden (**70% research and 30% supervision duties**).

Postdoc stays

- **Postdoc in Heat Transfer, Jul. 2021 – Jun. 2024,** at Department of Energy Sciences, Lund University, Sweden (**80% research and supervision and 20% teaching duties**).
- **Postdoc in modelling and simulations of shocks in plasma, Aug. 2020 – Jan. 2021,** at Okinawa Institute of Science and Technology Graduate University, Japan (**100% research**).
- **Postdoc in modelling and simulations of two-phase flows and turbulence, Mar. 2019 – Jul. 2020,** at Université Grenoble Alpes, France (**100% research**).

Visits abroad for research

- **Visiting Researcher (July 2026 - August 2026)** at Karlsruhe Institute of Technology, Germany (**100% research**).
- **Visiting Researcher (July 2025 - July 2025)** at Osaka Metropolitan University, Japan (**100% research**).
- **Visiting Researcher (October 2024 - October 2024)** at Karlsruhe Institute of Technology, Germany (**100% research**).
- **Visiting Researcher (May 2014 - July 2014)** at University of Calcutta, India (**100% research**).

Research funding grants

- [1.75 million SEK granted on 09/20/2025] **PI** for the “Hydrogen as a Catalyst for Climate-Neutral Fuels: Advancing Efficiency in the Energy Transition”. **Project funded** by Hains STIFTELSE.
- [1 million SEK granted on 05/26/2025] **PI** for the “Avancerade kylstrategier och flödesinducerad värmeöverföringsförbättring för industriella processer”. **Project funded** by Crafoord.
- [850 thousand SEK granted on 04/10/2025] **Co-PI** for the “Advanced Cooling Strategies and Flow-Induced Heat Transfer Enhancement for Industrial Processes”. **Two-year postdoc scholarship, project funded** by Kempestiftelserna.

- [109 million SEK granted on 04/09/2023] **Co-Applicant** for the “Advanced Computing for Sustainable Thermal Management in Industry (AdTherM)” Competence Centre. **Project funded** by Vinnova, and industry and academic partners. **Prof. Christer Fureby** is the PI.
- [73 thousand EURO granted on 06/15/2015] **PI** for the “Turbulence élastique inhomogène chargée de particules”. **Three-year PhD scholarship, project funded** by French Ministry of Higher Education and Research (MESRI).
- [2.6 million INR granted on 04/02/2015] **PI** for the “Scholarship for PhD in Indian Institutes by clearing GATE exam (not used since I did my PhD in France)”. **Project funded** by Ministry of Education (MoE), Government of India.

(Travel) Scholarships/Grants based on merit

- 2024: Travel grant of 15,000 SEK by Lund University, Sweden.
- 2023: Travel grant of 15,000 SEK by the Royal Physiographic Society of Lund, Sweden.
- 2023: Travel grant of 15,000 SEK and Conf. fee waiver by THMT'23/ICHMT, Italy.
- 2018: Travel grant of 1,500 EUR and Conf. fee waiver by Nice Sophia Antipolis Univ., France.
- 2018: Conf. fee waiver of 1,000 EUR by European Mechanical Society, Austria.
- 2017: Travel grant of 2,000 EUR and Conf. fee waiver by the Italian Inst. Theo. Phys., Italy.
- 2017: Travel grant of 1,200 EUR and Conf. fee waiver by EU COST action, Portugal.

(Academic) Awards and achievements

- **Awarded 1.75M SEK in December 2025** by Hains STIFTELSE in recognition of research with significant impact towards achieving a fossil-free and sustainable society. <https://www.hainstiftelser.se/stipendier>.
- **Qualification obtained in section 60** (Mechanical Engineering) of the French University National Committee (CNU), 2021. This qualification is mandatory to apply as an Assistant Professor in French universities. It is obtained after a tough national-level competition.
- Doctoral Days, 2015. **Won the 2nd Prize** for presenting a poster entitled “Mass transport of heavy particles in Elastic turbulence” in Douai, France.
- **Full tuition waiver and scholarship** for PhD at Université de Lille, France, 2015-2018.
- Qualified Graduate Aptitude Test in engineering exam by the Indian Inst. Tech. Kanpur, India with an **All-India Rank of 586. This qualification granted me a scholarship for 2015-2020.**
- Qualified Indian Inst. Tech. Joint Admission Test for M.Sc. in Mathematics by IIT DELHI, India, with an **All-India Rank of 486. This qualification granted me a scholarship for 2013-2015.**

Invited talks

- ***Solid State Physics, Lund University***, Transport of Inertial particles in non-homogeneous elastic turbulence 26th September 2025, **Sweden**.
- ***Hydrogen Fuel Cells Workshop II organized by Coventry University (UK) and Cochin University of Science and Technology (India) as a part of British Council's "Going Global Partnership"***, Direct numerical investigation of two-phase flow behaviour in polymer electrolyte membrane fuel cells, 18th -20th August 2025, **Online Mode**.
- ***The Swedish Society for Industrial Fluid Mechanics and Heat Transfer (SweSIFH)***, Additive Manufacturing: towards sustainable product development, reduced environmental impact, and advanced heat transfer capabilities, 9th -10th June 2025, **Sweden**.
- ***Biomedical Engineering, Lund University***, Transport of Inertial particles in non-homogeneous elastic turbulence: microfluidic perspective, 10th April 2025, **Sweden**.
- ***Indian Institute of Technology Roorkee***, The role of numerical capabilities in understanding the advanced heat transfer characteristics of additive manufacturing, 12 February 2025, **India**.
- ***Laboratoire de Thermique et Energie de Nantes UMR CNRS 6607 (LTeN)***, Additive manufacturing (AM): towards sustainable product development, reduced environmental impact and advanced heat transfer capabilities, 16 January 2025, **France**.

Dr. Himani Garg
D.O.B : 1992-05-14

- **Karlsruhe Institute of Technology (KIT)**, Heat Transfer in Additively Manufactured Surfaces with Varied Roughness, 11 April 2024, **Germany**.
- **Oak Ridge National Laboratory, Department of Energy (DOE, ORNL)**, Large Eddy Simulations of Heat Transfer in Additively Manufactured Surfaces with Varied Roughness, 19 February 2024, **USA**.
- **Siemens Energy AB**, Use of CFD to understand heat transfer over 3D printed rough surface flows, 8 March 2022, **Sweden**.
- **Unité de Mécanique de Lille**, Development of a numerical method for prediction of cavitation inception in the YALES2 code, 15 April 2021, **France**.
- **International Centre for Theoretical Sciences (ICTS)**, Inertial particles in non-homogeneous elastic turbulence, 16 January 2019, **India**.

Popular science presentations

- **Jan Hains Foundation for Scientific and Technical Research in the Environment and Climate** – Hydrogen for Climate-Neutral Fuels: A Strategic Initiative for Sweden's Energy Transition. **Presented at the Grand Hotel Lund, Sweden, 15 December 2025.**

Pedagogical training

- Teaching in Higher Education, 5hp (3 weeks), Spring 2025.
- Readership course (Docentkurs), 5hp (3 weeks), Spring 2022.
- Developing and leading courses in Higher Education (LTH), 5hp (3 weeks), Spring 2022.
- Workshop on coaching techniques in PhD supervision (LTH), 5hp (1 day), 26th Sept. 2023.

Teaching and course development

- **2021-present:** Course coordinator and Teacher in the Environment-Friendly Power Generation course - Master level at LTH (MVKN95, 50+ students).
- **2021-present:** Course coordinator and Teacher in the Multiphase Flow and Numerical Modelling course - Master and Ph.D. level at LTH (MVKP20, 15+ students).
- **2021-2022:** Course coordinator and Teacher in the Heat Transfer course - Bachelor level at LTH (MMVF05, 50+ students). Developed 50% of the course material from scratch.

Teaching and course development for Summer or Winter Schools

- **June 2025:** Developed and delivered lectures on Turbulence and Modeling during the first summer school organized in Lund on Advanced Computing for Sustainable Thermal Management in Industry (AdTherM), attended by 20 participants from academia and industry.

Supervision

- **Current:** 1 PhD student (as main supervisor), 4 PhD students (as assistant supervisor), 7 M.Sc. Thesis student (main supervisor), 20 M.Sc. Course (2.5 credit) Project students (as main supervisor)
- **Previous:** 2 PhD student (one as main supervisor and one as assistant supervisor), 1 PhD Exchange student (for 3 months, main supervisory role at Lund University), 5 M.Sc. thesis students (2 as main supervisor, 3 as assistant supervisor), 20 M.Sc. Course (2.5 credit) Project students (as main supervisor), 1 Bachelor Thesis student (as main supervisor)

Review and editorial assignments – active reviewer for SCI journals (Energy, European Journal of Mechanics, Physics of Fluids, Physical Review Fluids, Physical Review E, Physical Review Letters, Energy, Applied Thermal Engineering, Numerical Heat Transfer, International Journal of Heat and Fluid Flows, International Journal of Thermofluids, International Journal of Heat and Mass Transfer, International Communications of Heat and Mass Transfer, Flow Turbulence and Combustion, International Journal of Hydrogen Energy, Fluids, Aerospace, Energies, Applied Sciences).

Organization of scientific meetings

- **2026:** Organizer of the 3rd Seminar of Swedish Society for Industrial Fluid Mechanics and Heat Transfer (SweSIFH), 1st – 2nd June 2026, LTH, Sweden.
- **2025-present:** Board Member of the Swedish Society for Industrial Fluid Mechanics and Heat Transfer (SweSIFH), Sweden.
- **2025-present:** Editorial Board Member of the International Journal of Fluid Engineering (IJFE), AIP Publishing.
- **2025:** Member of the organizing committee of the 1st Summer School on Advanced Computing for Sustainable Thermal Management in Industry (AdTherM), Sweden.
- **2025-present:** Faculty partner of FOSSEE (Free/Libre and Open Source Software for Education) project funded by Ministry of Education (MoE), Government of India, IIT Bombay, India.
- **2024-present:** Member of election committee for hiring the Head of the Department, LTH, Sweden.
- **2021-2026:** Organizer of Heat Transfer division seminars, LTH, Sweden.
- **2018:** Member of the local organizing committee of the CNRS summer school Active Transport in the Ocean: Turbulence, Chemistry and Biology, France.
- **2016:** Member of the local organizing committee of the 51st Congress of the French Society of Rheology, France.
- **2016:** Member of the European COoperation in Science and Technology (EU COST) under the “Flowing Matter” action.
- **2014-2015:** Chairman at Young Indians Club of NIT Rourkela.
- **2013-2014:** Chief Coordinator at the INNOVISION Event at NIT Rourkela

List of selected research publications/exhibited artistic works/educational publications

Peer-reviewed published articles

1. **H. Garg** (2026), *Numerical Investigation of Turbulent Heat Transfer Over Rough Surfaces at Medium–high Prandtl Numbers*, accepted in the Journal of Turbomachinery (ASME).
2. **H. Garg**, R. Seppey, M. Mihaescu, C. Fureby (2026), *Turbulent Heat Transfer in Lattice-Structured Matrix Cooling Channels*, accepted in the Journal of Turbomachinery (ASME).
3. C. Antetomaso, S. S. Merola, M. Andersson, **H. Garg**, *Implementation of a forced-balanced-based dynamic contact angle model for multiple droplets in OpenFOAM*, Submitted to Comp & Fluids.
My contribution: I supervised the work, helped in conducting data analysis, and providing critical insights to strengthen the overall argument.
4. D. Yang, **H. Garg**, M. Andersson, A framework for stochastic reconstruction of gas diffusion layers with enhanced fiber morphology modulation and additive incorporation, *Materials Today Commun.* 53 (115303), 2026. <https://doi.org/10.1016/j.mtcomm.2026.115303>.
My contribution: I supervised the work, helped in conducting data analysis, and providing critical insights to strengthen the overall argument.
5. E. Naversten, F. Maletzke, N. Rignell, **H. Garg**, *Steady-state RANS investigation of turbulent heat transfer in matrix cooling channels for gas turbine blades*, *Case Studies Thermal Eng.* 82 (108102), 2026. <https://doi.org/10.1016/j.csite.2026.108102>.
My contribution: I supervised the work, helped in conducting data analysis, and providing critical insights to strengthen the overall argument, wrote some parts of the paper.
6. N. Adhikari, B. Baral, M. Andersson, **H. Garg**, *Numerical modelling of solar dryers focusing on the heat exchangers and solar collectors-comparing flat and rib designs with varying flow*, *Case Studies Thermal Eng.* 80 (107874), 2026. <https://doi.org/10.1016/j.csite.2026.107874>
My contribution: I supervised the work, helped in conducting data analysis, and providing critical insights to strengthen the overall argument, wrote some parts of the paper.
